The ENRI International Workshop on ATM/CNS (EIWAC2009) will be organized by the Electronic Navigation Research Institute with the support of the Civil Aviation Bureau (JCAB), Ministry of Land, Infrastructure, Transport and Tourism of Japan. The workshop will open on 5th March 2009 at the Otemachi Sankei Plaza, Tokyo, and conclude the following day. ENRI is a research institution established by the Japanese Government and has been actively supporting the JCAB on CNS/ATM systems for more than 40 years.

The workshop offers an opportunity not only to share information on the progress of Research, Development and Implementation activities being carried out in various parts of the world such as NextGen in the US and SESAR in Europe but also to promote discussion on the possible future activities among administrations and researchers. On the first day the workshop participants will be presented master plans and on-going activities of the US, Europe and Japan. On the second day, two simultaneous sessions on Research and Development will be organized in the morning and afternoon. Topics of each session are planned as follows:

5th March: Master Plans and On-Going Activities
6th March am: Trajectory Management and Related Topics
              CNS Enablers
6th March pm: Airport Management and Its Performance
              Safety and Human Factor Issues
