THIRD AND FINAL EFFICIENSEA MAJOR EVENT

An invitation has been issued by the Danish Maritime Safety Administration (DAMSA) for the Third and final EfficienSea Major Event arranged with the Estonian Maritime Administration and to be held in Tallinn, Estonia on 21st and 22nd September this year.

The EfficienSea project started in January 2009. Now almost three years have passed the organisers have called for fresh input and focus in order to make the most out of the project.

On 21st September, the respective themes of the project will be:
- Recruitment and Competences
- e-Navigation
- Maritime Planning and Vessel Traffic Data
- Dynamic Risk Management

These topics will be presented by the work package leaders.

On 21st September the afternoon session will include presentations and a panel discussion with representatives from the project, from other Baltic Sea projects, and stakeholders in the Baltic Sea region, the EU and beyond. The following day will be dedicated to project workshops in the respective work packages.

Management Board members will meet on 20th and 22nd September.

For more detailed information, programme and registration advice, readers are invited to visit www.efficiensea.org, or go directly to the How to register to Staying Focused link.
